

PLATFORM OVERVIEW

Smart Campus Management

Transforming hostel administration and student experience with real-time data and AI-powered automation.

THE PROBLEM

The Disconnected Campus

College Administrators

Forced to rely on scattered messages and manual paper registers to manage hundreds of students efficiently.

Students

Face daily friction in essential tasks like obtaining gate passes, checking mess menus, and tracking fee payments.

The Core Issue

No single source of truth. Security relies on easily forged paper passes, leaving administrative data entirely disconnected.

The Unified App Platform

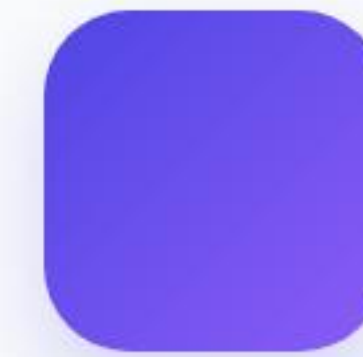

Role-Based Portals

A single, centralized web dashboard featuring highly dedicated and secure portals tailored specifically for Students, Guests, and Admins.

Instant Information

Real-time summary cards provide immediate visibility into room allocation, electricity billing, and the daily status of the mess hall.

The AI Twist

We replaced archaic paper registers with an AI-powered Digital Gate Pass utilizing facial recognition for foolproof automated security.

Modern Tech Stack

Design & Prototyping

Figma AI: Utilized to rapidly architect and visually validate the high-fidelity UI/UX within a strict 7-hour sprint constraint.

Frontend Architecture

React / Next.js: Powers a highly responsive, component-based dashboard rendering for seamless cross-device experiences.

Backend & Database

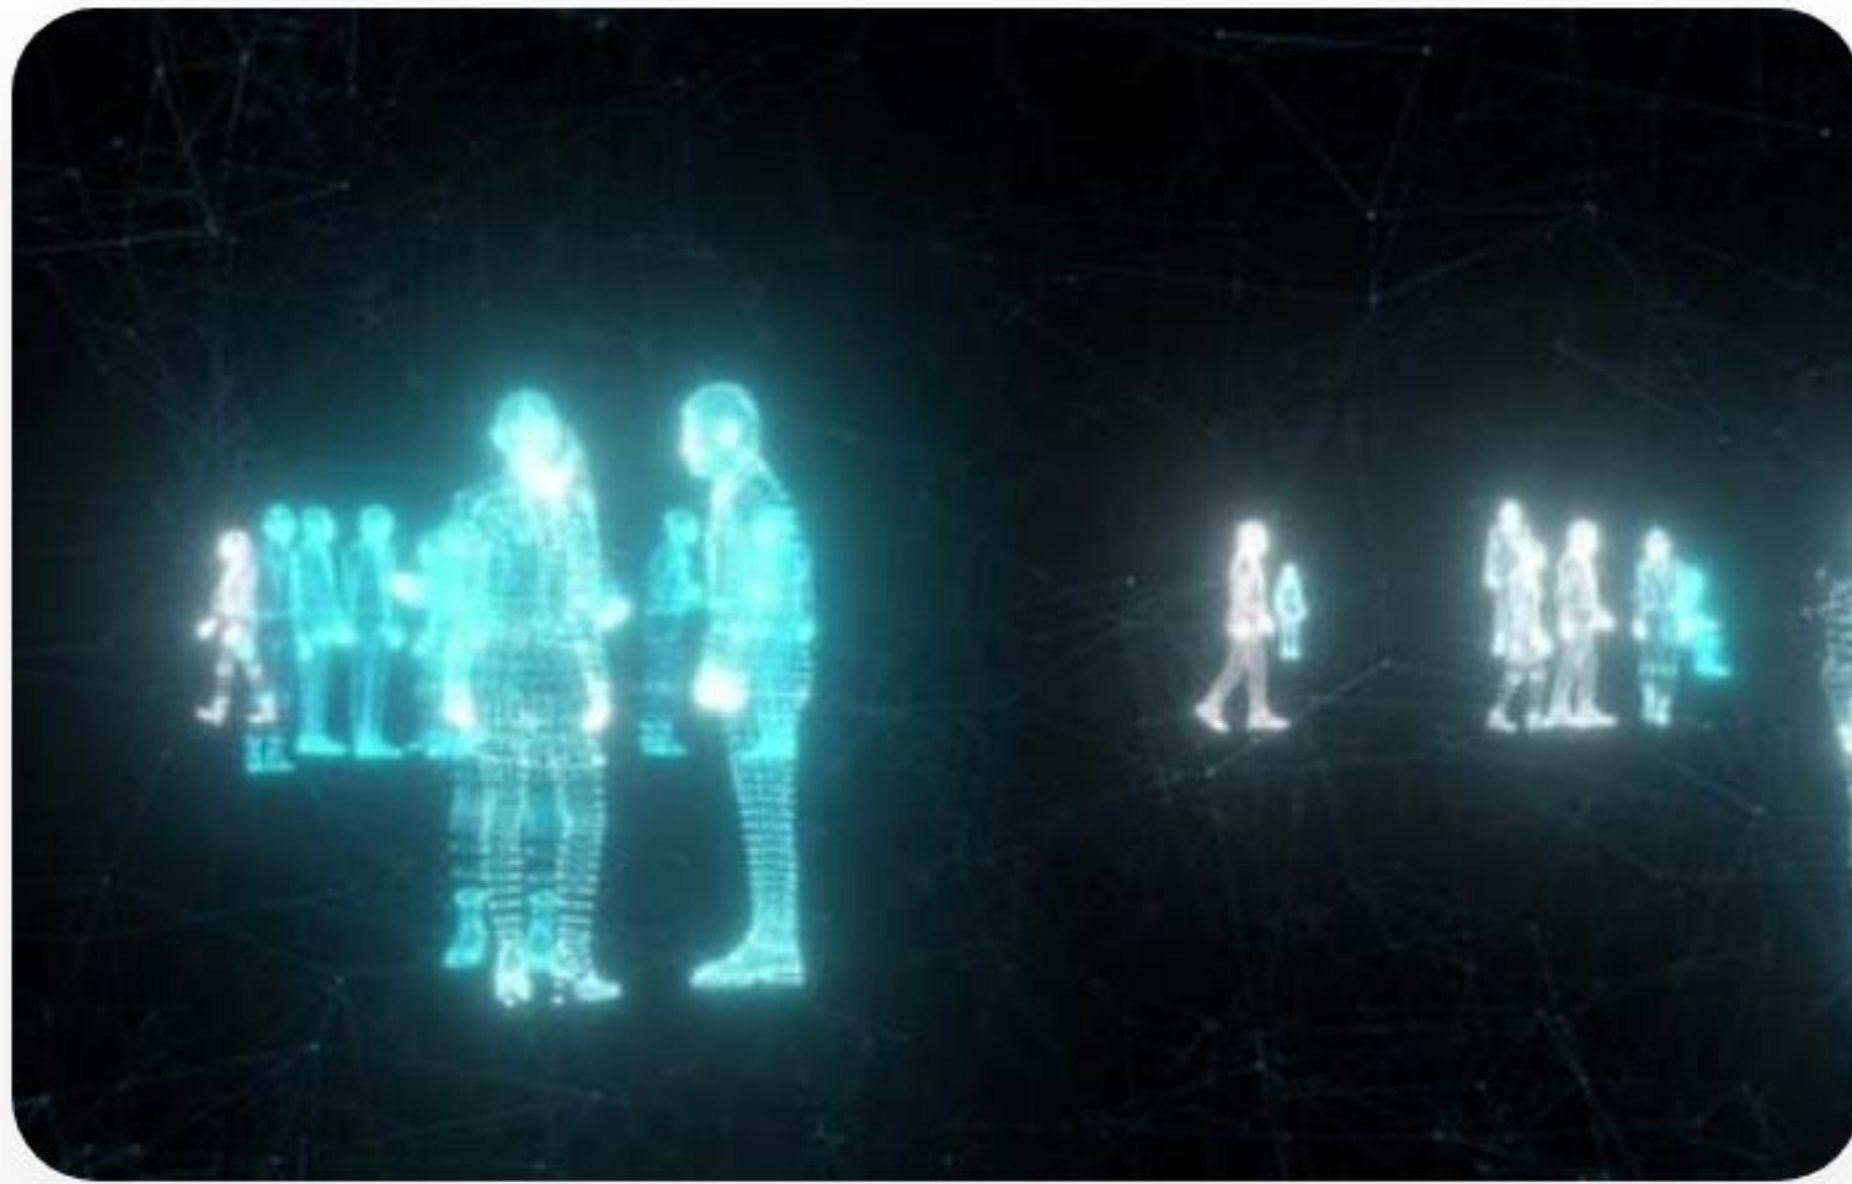

Node.js & PostgreSQL: Ensures secure, robust, and scalable role-based data processing and system state management.

AI Integration

Face Recognition APIs: Seamlessly integrated into the gate-entry flow to enforce secure, automated identity verification.

Future Innovations

Intelligent Alerts

Integrating smart CCTV analytics to monitor mess hall capacity and push predictive alerts to dashboards when areas hit 90% occupancy.

 Futuristic data heatmap interface

Predictive Analytics

Equipping wardens with a visual heatmap of hostel occupancy trends and automated machine-learning for complaint pattern recognition.

One-Click Payments

Wiring up the mock electricity and fee cards to a live payment gateway (like Razorpay or Stripe) for seamless, automated digital billing.

Questions?

Thank you for exploring the future of campus management.
